Editorial

The Journal of Nepal Mathematical Society (JNMS) is the official journal published by Nepal Mathematical Society (NMS). The society would like to increase the number publications within the scope and aims of the journal and would like to proceed for different scientific indexing in near future. This journal will be publishing the high-quality theoretical results, new mathematical models and algorithms, and efficient computational studies in any field of pure and applied mathematics. The journal also emphasizes the original mathematical papers devoted to the mathematical sciences with mathematical treatment of questions arising in the real-life problems, like computer science/informatics, physics, chemistry, biology, medicine, geophysics, engineering, management and all applied sciences. We are proud to announce that a number of leading mathematicians and scientists from around the globe are in our editorial board.

This first issue has been published both in online and in print form. It contains seven research papers in different fields of pure and applied mathematics. We would like to thank all the authors of this issue for sharing their scientific research outcomes in their papers through this journal. We are highly obliged to all the reviewers and editors for their voluntary and painstaking job to uplift the quality of the papers. We would also like to acknowledge all the people who helped us to bring the journal in this form.
We thank to Mr. Ananda Krishna Shrestha (Sukunda Pustak Bhandar, Kathmandu, Nepal) for the financial support on publication of the Journal in the print form.

We would like to request and invite research scientists/scholars nationally and internationally to submit their papers for the upcoming issues.
